

专题 03 主旨大意题-把握文脉明主题

主旨大意题是阅读理解中学生失分最多的题目，因为该类题目不仅考查略读文章、领会大意的能力，也对归纳概括能力提出了较高的要求。该类题目在文章中没有明显的解题依据，需要从文章中提炼、抽取一些关键词、主干句进行加工概括，才能归纳出文章的主旨。因此，遇到主旨大意题时切勿草率作答，一定要读完、读通文章后再做判断，建议学生将此类题目放在最后来做。

一、熟知题型特点与设问方式

(一)命题解读

- 1. 主旨大意题考查的是对文章内容的深层次理解、概括能力，它要求在充分理解全文的前提下，对整篇文章的主旨大意有一个较为清晰的印象。主旨大意题分为标题归纳类和文章大意类。
- 2. 标题归纳类要求学生选出文章的最佳标题，文章大意题和段落大意题考查文章或段落的主旨大意。

(二)题型特点

- 1. 把握主旨大意题常见的设问方式：

The best title for the passage is \_\_\_\_\_.

The passage is mainly about \_\_\_\_\_.

Which of the following is the best title for the passage?

What is the text mainly about?

The main idea of the second paragraph probably is \_\_\_\_\_.

What is the first paragraph mainly about?

- 2. 掌握主旨大意题的考查角度：

- (1)高频考点：标题归纳题、文章大意题；
- (2)低频考点：段落大意题。

二、明了主旨大意题的正确选项和干扰选项的特征

| 正确选项特征                                                                                      | 干扰选项特征 |                        |
|---------------------------------------------------------------------------------------------|--------|------------------------|
| 1.涵盖性强，覆盖全文或全段。<br>2.确定的范围恰当，既不能太大，也不能太小。<br>3.精确性强,不会改变语言表意的程度及色彩。<br>4.含有文章关键词或者有象征意义的事物。 | 以偏概全   | 只阐述了局部信息或主题的某一个方面      |
|                                                                                             | 主题过大   | 归纳概括过于宽泛，超出了文章实际所讨论的内容 |
|                                                                                             | 断章取义   | 以次要的事实或细节冒充全文的主要观点     |
|                                                                                             | 无中生有   | 与文章内容毫不相干或与文章内容相悖      |

破解主旨大意题的三大类型

类型(一) 标题归纳题

标题归纳题要求在理解文章的基础上，结合文章的体裁和结构，从所给选项中选出适合文章的标题。注

意最佳标题的特点：精准性强，不改变原文的意义和感情色彩；覆盖性强，能概括全文并体现文章的主旨。

| 理解标题的 3 大特点                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | 巧用 3 大方法确定文章标题                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |           |                                              |           |   |           |     |

类型(二) 文章大意题

文章大意是作者在文章中所要表达的主要内容，是全文的核心思想，也是作者在文章中通过行文逻辑和各种细节来阐明的中心话题。掌握寻找文章主题的 3 个小技巧，可以快速确定文章大意。

技巧 1 主题句法

解答文章大意题，找准文章的主题句是关键。下面介绍两种快速找出主题句的方法：

(1)根据文体和写作手法来定位主题句

(2)根据行文标志来定位主题句

|     |                                                                     |
|-----|---------------------------------------------------------------------|
| 转折词 | 段落中出现表示转折的词语，如 but、 however、 in fact、 actually 等，转折词后的句子很可能是主题句     |
| 总结词 | 表示总结或结论的词语，如 therefore、 thus、 in short、 conclude 等，总结词后的内容往往是文章的主题句 |
| 疑问句 | 若首段出现疑问句时，对该问题的回答可能是文章的主题句                                          |

技巧 2 高频词法

若全文中无明显主题句时，我们可以利用文章中的高频词找出文章主题句。任何一篇文章都是围绕某个

主题展开的，因此，有的文章中最明显的特点之一是有一个反复出现的中心词，即高频词，也叫作主题词。抓住它，便容易抓住文章的中心

技巧 3 逆向思维法

在两个选项看上去都十分正确且无法选择时，试着从选项出发，想象一下如果自己以此选项来写文章会有哪些内容，然后把它与文章的内容相比较，接近的即为正确选项

【典例】

When I was 9, we packed up our home in Los Angeles and arrived at Heathrow, London on a gray January morning. Everyone in the family settled quickly into the city except me. Without my beloved beaches and endless blue-sky days, I felt at a loss and out of place. Until I made a discovery.

Southbank, at an eastern bend in the Thames, is the center of British skateboarding, where the continuous crashing of skateboards left your head ringing. I loved it. I soon made friends with the local skaters. We spoke our own language. And my favorite: Safe. Safe meant cool. It meant hello. It meant don't worry about it. Once, when trying a certain trick on the beam (横杆), I fell onto the stones, damaging a nerve in my hand, and Toby came over, helping me up: Safe, man. Safe. A few minutes later, when I landed the trick, my friends beat their boards loud, shouting: “Safe! Safe! Safe!” And that's what mattered — landing tricks, being a good skater.

When I was 15, my family moved to Washington. I tried skateboarding there, but the

「解题导引」

第一步 读文章，概括文意

Part 1  
Introduce  
the background

Paragraph 1: When I was 9, we packed up our home in Los Angeles and arrived at Heathrow, London on a gray January morning. Everyone in the family settled quickly into the city except me.

Part 2  
Tell the  
development  
of the story

Paragraph 2: I soon made friends with the local skaters. We spoke our own language. And my favorite: Safe. Safe meant cool. It meant hello. It meant don't worry about it.

Part 3  
Tell the end  
of the story

Paragraph 3: When I was 15, my family moved to Washington.

Paragraph 4: But soon I caught a few of his glances. “I was a local here 20 years ago,” I told him. Then, slowly, he began to nod his head. “Safe, man. Safe.”

Paragraph 5: “Yeah,” I said. “Safe.”

第二步 析选项，斟酌判断

|   |                                            |           |
|---|--------------------------------------------|-----------|
| A | 儿童应当学习第二外语。文中没有这种说法                        | 无中生有，生搬硬套 |
| B | 体育运动对儿童健康是非常必要的。文中虽提到了滑板运动，但并未涉及滑板运动对健康的作用 | 无中生有，曲解文意 |
| C | 儿童需要归属感。文章描述了作者通过滑板运                       | 涵盖性强，覆盖全文 |

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |   |  |                                                |           |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---|--|------------------------------------------------|-----------|
| <p>locals were far less welcoming.Within a couple of years, I'd given it up.</p> <p>When I returned to London in 2004, I found myself wandering down to Southbank, spending hours there.I've traveled back several times since, most recently this past spring.The day was cold but clear; tourists and Londoners stopped to watch the skaters.Weaving (穿梭) among the kids who rushed by on their boards, I found my way to the beam.Then a rail-thin teenager, in a baggy white T-shirt, skidded (滑) up to the beam. He sat next to me.He seemed not to notice the man next to him.But soon I caught a few of his glances.“I was a local here 20 years ago, ” I told him.Then, slowly, he began to nod his head.“Safe, man.Safe.”</p> <p>“Yeah,” I said.“Safe.”</p> <p>31.What message does the author seem to convey in the text ?</p> <p>A. Children should learn a second language.</p> <p>B.Sport is necessary for children's health.</p> <p>C.Children need a sense of belonging.</p> <p>D.Seeing the world is a must for children.</p> |   |  | 动融入新生活、结交当地人的经历，表达了归属感、集体感对于儿童的必要性，因此该选项符合文章主旨 |           |
|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | D |  | 看世界对于儿童来说是件必要的事情。文中没有这种说法                      | 无中生有，生搬硬套 |

第三步 对比选项得出答案

自主解答 \_\_\_\_

类型(三) 段落大意题

段落大意题主要考查段落的主要意思，是对某个段落基本内容的简缩和概括。概括、总结、归纳段落大意就是用准确、简练的语言把一个段落的主要意思明确而完整地表达出来。

|                 |         |

A

Americans are drinking less milk today than they did 40 years ago. In fact, Americans are drinking about 40 percent less than they did in 1975.

This decrease has led the United States dairy industry to explore new ways to get people to drink milk. One method it is testing: helping to set up coffee bars in US high schools.

Schools prepare coffee drinks in different ways, but milk is always the main ingredient in lattes (拿铁). “Lattes are really milk with some coffee,” notes Julie Ostrow of the Midwest Dairy Association.

That is why Midwest Dairy is providing financial help for a coffee bar at a fourth high school in the Fort Zumwalt, Missouri area during the upcoming school year. In exchange, the group will get data on how much milk is used for the lattes, as well as other information about food products with dairy.

Dairy groups have worked with high schools in many states. At a high school in North Dakota, for example, a \$5, 000 grant from a dairy group helped pay for a coffee machine. The device makes lattes with about 0.23 liters of milk each. The drinks used around 2, 000 liters of milk this past school year. In Florida, a dairy group said it paid for coffee carts in 21 high schools this past year.

“While dairy is a good way to get calcium and vitamin D, it is not the only way to get such nutrients,” says Doctor Natalie Muth. She is a childcare specialist.

As for lattes, Muth said there are ways to persuade students to get the nutrients of milk without promoting caffeine use.

“If they're going to be having that outside of school, that's one thing. But in schools, the idea is to promote good health and nutrition,” she said.

语篇解读：本文是一篇说明文。为了促进学生们对牛奶的消费，美国奶业大力扶持校园咖啡吧的建设。

1. What does Julie Ostrow think of latte?
- A. It contains more milk.

B. It contains more coffee.

C. It is less nutritious than milk.

D. It is more nutritious than milk.

2. Why do the United States dairy industry help set up coffee bars at school?

A. To replace milk with coffee.

B. To promote the sale of milk.

C. To offer students more choices.

D. To change students' drinking habits.

3. What's the fifth paragraph mainly about?

A. Dairy groups donate money to schools.

B. Dairy groups support school coffee bars.

C. Coffee devices use much milk every day.

D. Coffee devices are popular in many schools.

4. What attitude did Natalie Muth take towards coffee bars at school?

A. Confused.

B. Confident.

C. Negative.

D. Favourable.

## B

Older women who walk a little over three kilometers each day might live longer than less active women of the same age, a new study suggests.

Many Americans hoping to stay healthy set a daily goal of 10,000 steps, or about eight kilometers. They often have this goal because they are wearing electronic devices which set that target, note researchers in the United States. Their findings appeared recently in the publication *JAMA Internal Medicine*.

But it is not clear how much intensity (强度) or speed matter when counting the health benefits of every step, the researchers write. They add that 10, 000 steps per day might not be the right goal for everyone.

For the study, researchers observed 17, 000 women, all in their early 70s. They asked the women

to wear accelerometers for at least four days. Accelerometers are small devices that measure the number of steps and the intensity of movement.

The researchers followed up with the women much later, around 4.3 years later, on average. Since the beginning of the study, 504 women had died. Compared to women who took no more than 2, 718 steps daily, the women who took at least 4, 363 steps per day were 41 percent less likely to die.

“The women who took more steps had lower mortality rates (死亡率) until about 7, 500 steps per day, beyond which no further declines were observed,” I-Min Lee, the lead writer of a report on the study, told the Reuters news agency. “The rate of stepping did not matter in these older women; it was the number of steps that mattered.”

“Still, the results are good news for older adults who may have difficulty walking at faster paces,” said Keith Diaz, a researcher at Columbia University Medical Center in New York City.

“Any walking is better than nothing,” Diaz said by email. “With even small amounts of walking, your risk of death will be sharply reduced.”

语篇解读：本文是一篇说明文。美国一项研究表明，每天步行三公里以上的老年妇女会比同龄人寿命更长。

5. Many Americans have a daily goal of 10, 000 steps under the influence of \_\_\_\_\_.

- A. health experts
- B. scientific studies
- C. technology products
- D. their friends and relatives

6. What's special about the study?

- A. The method it used.
- B. The length of time it took.
- C. People of all ages took part in it.
- D. Participants were from many countries.

7. What's really important according to I-Min Lee?

- A. The speed.
- B. The intensity.
- C. The distance you cover.

D. The calories you burn off.

8. What's the passage mainly about?

A. The health benefits of walking.

B. The advantages of movement.

C. The importance of exercise intensity.

D. The necessity of taking 10, 000 steps.

C

Arctic sea ice has been steadily decreasing since the beginning of satellite records in 1979, but a new study comes with a chilling (or perhaps, warming) prediction: By the end of this century, Arctic sea ice may disappear during the summer, which could drive polar bears and other ice-dependent species to extinction.

The “Last Ice Area” is a region containing the oldest, thickest Arctic ice. It spans an area of more than 380,000 square miles (1 million square kilometers) from the western coast of the Canadian Arctic Archipelago to Greenland's northern coast. When scientists named the 13-foot-thick (4 meters) ice region, they thought it would last for decades.

But now, under both the most optimistic and pessimistic scenarios (情形) for warming linked to climate change, the sea ice will dramatically thin by 2050. The most optimistic scenario, in which carbon emissions are immediately and dramatically curbed to prevent the worst warming, could result in a limited portion of the ice surviving in the region. In the most pessimistic scenario, in which emissions continue at their current rate of increase, the summer ice — and the polar bears and seals that live on it — could disappear by 2100, researchers reported in a new study.

“Unfortunately, this is a massive experiment we're doing,” study co-author Robert Newton, a senior research scientist at Columbia University's Lamont-Doherty Earth Observatory, said in a statement. “If the year-round ice goes away, entire ice-dependent ecosystems will collapse, and something new will begin.”

As carbon dioxide and other greenhouse gases increasingly contribute to the warming of the atmosphere, the past 15 years has brought the lowest 15 sea-ice extents in the satellite record, according to the National Snow and Ice Data Center (NSIDC). Worse still, the NSIDC reports that the amount of older, thicker Arctic ice that has survived at least one melt season is at a record low. A

more dramatic decrease in ice coverage could have a serious effect on the lives of the animals that live on, or under, the shifting ice network, including photosynthetic algae, tiny crustaceans, fish, seals, narwhals, bowhead whales and polar bears.

语篇解读：本文是一篇说明文。由于全球变暖的原因，北极冰层正在逐渐减少，而北极冰层的消失将最终导致北极熊的灭绝。

9. What will present a great threat to the species in the Arctic according to the study?

- A. Lack of necessary food.
- B. Pollution of ocean water.
- C. The loss of their habitats.
- D. The extreme cold weather.

10. What does the underlined word “curbed” in Paragraph 3 mean?

- A. Improved.
- B. Predicted.
- C. Determined.
- D. Controlled.

11. What does the author intend to express in the last paragraph?

- A. His concern over the Arctic animals' future.
- B. His surprise at the great amount of Arctic ice.
- C. His curiosity about the reasons for low sea-ice extents.
- D. His doubt about the dramatic decrease in ice coverage.

12. What would be the best title for the text?

- A. “Last Ice Area” Is on the Decrease
- B. Polar Bears Could Become Extinct
- C. Small Ice Coverage Has Negative Effects
- D. Greenhouse Gases Lead to Global Warming
